15     **Open Research Section**

16     This section MUST contain a statement that describes where the data supporting  
17     the conclusions can be obtained. Data cannot be listed as "Available from authors" or  
18     stored solely in supporting information. Citations to archived data should be included  
19     in your reference list. Wiley will publish it as a separate section on the paper's page. Ex-  
20     amples and complete information are here: <https://www.agu.org/Publish with AGU/Publish/Author>  
21     Resources/Data for Authors

22     **As Applicable – Inclusion in Global Research Statement**

23     The Authorship: Inclusion in Global Research policy aims to promote greater eq-  
24     uity and transparency in research collaborations. AGU Publications encourage research  
25     collaborations between regions, countries, and communities and expect authors to in-  
26     clude their local collaborators as co-authors when they meet the AGU Publications au-  
27     thorship criteria (described here: <https://www.agu.org/publications/authors/policies#authorship>).  
28     Those who do not meet the criteria should be included in the Acknowledgement section.  
29     We encourage researchers to consider recommendations from The TRUST CODE - A  
30     Global Code of Conduct for Equitable Research Partnerships (<https://www.globalcodeofconduct.org/>)  
31     when conducting and reporting their research, as applicable, and encourage authors to  
32     include a disclosure statement pertaining to the ethical and scientific considerations of  
33     their research collaborations in an "Inclusion in Global Research Statement" as a stan-  
34     dalone section in the manuscript following the Conclusions section. This can include dis-  
35     closure of permits, authorizations, permissions and/or any formal agreements with lo-  
36     cal communities or other authorities, additional acknowledgements of local help received,  
37     and/or description of end-users of the research. You can learn more about the policy in  
38     this editorial. Example statements can be found in the following published papers: Holt  
39     et al. (<https://agupubs.onlinelibrary.wiley.com/doi/full/10.1029/2022JG007188>), Sánchez-  
40     Gutiérrez et al. (<https://agupubs.onlinelibrary.wiley.com/doi/abs/10.1029/2023JG007554>),  
41     Tully et al. (<https://agupubs.onlinelibrary.wiley.com/doi/epdf/10.1029/2022JG007128>)  
42     Please note that these statements are titled as "Global Research Collaboration State-  
43     ments" from a previous pilot requirement in JGR Biogeosciences. The pilot has ended  
44     and statements should now be titled "Inclusion in Global Research Statement".

45     **Conflict of Interest declaration**

46     Please include a comprehensive conflict of interest statement that reflect all con-  
47     flicts of interest for all involved authors. If there are no conflicts of interest please state,  
48     "The authors declare there are no conflicts of interest for this manuscript."

49 **Acknowledgments**

50 Enter acknowledgments here. This section is to acknowledge funding, thank colleagues,  
51 enter any secondary affiliations, and so on.
