DEPARTMENT OF COMPUTING

Imperial College PhD Thesis

nuric

April 12, 2022

Submitted in part fulfilment of the requirements for the degree of Doctor of Philosophy in
Computing of Imperial College London and the Diploma of Imperial College London.

Declaration of Originality

I, nuric, declare that the work in this thesis is my own. The work of others has been appropriately referenced. A full list of references is given in the bibliography.

Copyright

The copyright of this thesis rests with the author and its contents are made available under a Creative Commons Attribution Non-Commercial Share-Alike 4.0 International (CC BY-NC-SA 4.0) License. You may copy and redistribute the material in any medium or format. You may also remix, transform or build upon the material. In doing so, you must give appropriate credit to the author, provide a link to the license and indicate if any changes were made. If you remix, transform or build upon this material, you must redistribute your contributions under the same license. You may not use the material for commercial purposes.

Abstract

Some abstract that manages to somehow summarise everything the entire thesis did. Good luck.

Acknowledgements

Firstly, the loved ones. For example your family is a great starting point.

Secondly, your supervisor.

Finally, your colleagues and friends.

Dedication

For my loved one(s).

List of Tables

Chapter 1

Introduction

This is a citation [1]. Also, Greenwade [1] has shown something important.

Chapter 2

Background

An overview of a multi-layer perception is shown in Fig. 2.1.

Figure 2.1: A multi-layer feed-forward neural network with 3 inputs, a single hidden layer with 5 neurons and 2 outputs. Every output is connected to every input of the subsequent layer.

Bibliography
