

L^AT_EX beamer using UniBWM's Corporate Design

Universität der Bundeswehr München

Marei Peischl

Beta Version

Status information

This template is still work in progress as some layout decisions are not yet resolved. We still decided to publish it to offer the possibility to let us know about specific wishes to get a better understanding of your way of using it.

In case you face any issues or have feature requests as well as suggestions, please let us know! Email: unibwm-ci@peitex.de

Documentation

The unibwm-beamer class

- Basic usage identical to beamer
- No special syntax required

Title page variants

Additional Features for titlegraphic/logos

- `\logo` additional logo next to the title
- `\titlegraphic` place image as a background for title slide

Scaling logos/titlegraphic

- The commands shown on previous slide support `\height/\width` to adjust the size to be used for graphic scaling.
- All have a starred variant (e.g. `\logo*{\includegraphics{example-image}}`). This will automatically scale/clip the logo/image to desired size.

Color Scheme

The new design introduced new colors to be used to highlight specific content.

The additional colors are:

unibwm-rostorange: 

unibwm-anthrazit: 

unibwm-gray1: 

unibwm-gray2: 

unibwm-gray3: 

unibwm-gray4: 

unibwm-gray5: 

Remark on vertical alignment (especially columns)

The vertical alignment has been changed from `c` to `t` in contrast to beamers default setup. Therefore frame content will be top aligned as required by the design guideline.

This is leading to some side effects, e.g. with the `columns` environment.

To resolve this one can either globally add the `c` option to restore beamer's default or pass it to the environment itself.

- one
- two
