

Unix Shell Cheat Sheet

This cheat sheet serves as a reference guide to Unix Shell and is not a substitute for a formal tutorial. If you're new to the party I highly recommend reading The Carpenters' [Unix Shell Tutorial](#)

Common Commands

Change directory to `/file/path`

```
cd /file/path
```

List contents of working directory

```
ls
```

<code>-l</code>	long list format
<code>-h</code>	human readable format
<code>-t</code>	sort by time
